

Export, share and view your cases

Anytime, anywhere, and anyway you want

NemoBox is a simple and intuitive web service that allows the dentist to export, share or visualize clinical records such as photographs, radiographs, 3D STL files, DICOM, etc.

Have access to clinical records in any device, at anytime, anywhere and by any user.

Is a web page and is not necessary to install anything on the device. Have visual access to your cases anywhere. NemoBox is a multiplatform service accessible from any computer, tablet, Smartphone or Smart-TV, for any user no matter where they are.

You can access your patient's clinical records up to 30 days with **NemoBox**. This new service is integrated into the **NemoStudio Suite**, the multidisciplinary platform that introduces your office to the new digital era.

BENEFITS

Export in a few clicks

Digital platform that allows to export in a single site all your digital cases easily.

Universal display

Cloud service with maximum availability and real time-accessible connection from any device.

Share express

Web platform that allows sharing cases between the different disciplines or with dental laboratories saving time and helping the doctors to go through with multidisciplinary treatment.

Produce greater confidence

Great patient's communication tool. Show them their customized cases, evolutions, and interact with patients by making them a participant. It improves the patient's experience and facilitates their decision in accepting treatment plan.

CHARACTERISTICS (FEATURES)

- Export patient records up to 30 days to share with other doctors, radiology centers or laboratories
- Store cases and patients files: photographs, x-rays, 3D STL models, DICOM, etc.
- Visualize individual photograph or series of photographs using intuitive icons automatically
- Calibrate, take measurements, and orientate multiple photographs (wizard)
